# EMİN

İNŞAAT A.Ş.

Emin Construction Corporation is founded in Aksaray in 1967. At the beginning, company entered the construction industry as a residential building company. From that time to present time company have been able to grow continuously based on reliability, high quality and success. Our client's requirements are our main guide to serve them properly. We are now highly experienced about every type of construction activity; including industrial projects, road projects, concrete manufacturing, crushed stone manufacturing etc. We are one of the leading companies in Aksaray region with around 100 employees, four concrete batching plants, 2 high capacity crushed stone plants and highly experienced construction team with good management skills.

We are able to increase our capacity rapidly and swiftly according to the owner's requirements. The main recent projects which we participated as a subcontractor are Botaş Tuz Golu Natural Gas Storage Project, Kazan Soda Project, İsdemir Coke Oven Battery Project and Tuz Golu Natural Gas Storage Expansion Project which have great reputation in Turkey. We are proud of being part to these great projects in Turkey and expecting to undertake more works for next coming similar projects. It is great honor for us to be evaluated as a candidate of a subcontractor for second stage of the Tuz Gölü Project.

Yours sincerely,  
TURGAY EROGLU  
Chairman of the Board

## SOME OF THE COMPLETED PROJECTS

### ***BOTAS TUZ GOLU UNDERGROUND NATURAL GAS STORAGE PROJECT, AKSARAY***

BOTAŞ was established in 1974 to transport oil through pipelines. In order to meet the increasing energy need in our country, it has also started its activities related to natural gas trade and transportation since 1986. Based on this, Tuz Golu Natural Gas Underground Storage Project is being carried out in Sultanhani district of Aksaray province, approximately 40 km south of Tuz Golu. In the first phase of this project, we worked with China Tianchen Engineering Corporation, and Emin Construction undertook the construction of surface facilities, drilling locations, pumping stations and asphalt roads. We have also participated as a subcontractor of CAMCE-ICTAS partnership in the second phase of expansion project.

## CİNER KAZAN SODA ELECTRIC PROJECT, ANKARA

Ciner Kazan Soda Electric is the world's largest soda ash producer. Emin Construction built the temporary roads, infrastructure of the project and built permanent asphalt and concrete roads for the China Tianchen Engineering Corporation company, which carries out the Kazan Soda Electric project, which started commercial production in 2017. At the same time, it carried out the reinforced concrete foundation works in the Natural Gas Cogeneration Plant. It is currently signing a new contract within the scope of the expansion project.

## İSDEMİR PROJECT, HATAY

İsdemir, founded in 1970, is one of the OYAK Mining Metallurgy companies and is the largest integrated iron and steel factory in our country in terms of its long production capacity. The Chinese company ACRE Coke Technologies Engineering Construction Industry and Trade Limited Company undertook İsdemir's work of the modernization of 3rd Coke Battery. Emin Construction, as the subcontractor of this company, carries out the contracting and infrastructure works. The work done; The work of strengthening the coke battery made 50 years ago by the Russians, the construction of a dust collection building from scratch, the construction of a steel building of 2500 square meters for bricklaying.

## VILLA MONZA PROJECT, ANKARA

Villa Monza is rising in Incek, one of the most popular districts of Ankara, with the signature of Kasır Architecture. The project, which consists of 13 villas with ultra-luxury concept, is being built on a total area of 9524 m<sup>2</sup>. The excavation, foundation and rough construction works of the villas with a total of 4 floors and a closed area of 650 m<sup>2</sup> are carried out by Emin İnşaat.

## SAFİR BUSINESS CENTRE PROJECT IN AKSARAY

This construction is a project for the use of the Hotel, Aksaray Bar Association, restaurant and offices operating in various fields. The business center located in Aksaray city center, consisted of 60 units of flat, 5 units of double story shop and 33 units of office.
